

THE DIFFERENCES BETWEEN AN
ACTIVITY AND A PROJECT

There is a set course of steps to follow like a recipe.	The process reveals unforeseen paths toward a solution.
Mostly lower level thinking skills are needed.	Critical thinking skills like analysis and evaluation are needed.
It involves limited technology.	It involves various uses of technology.
It can easily be completed by one student.	There is a collaboration of people to share ideas.
You know the end result at the beginning.	You aren't sure what will solve the problem.
The teacher tells you what needs to be done.	The teacher lets you decide what needs to be done based on needs and suggestions.
You have a definite deadline/limited time.	You have time to figure out what needs to be done.

Which one do you have?
